

WORKSHOP STG17 · GOOGLE EARTH ENGINE

Registering for Google Earth Engine

A step-by-step guide to registering a Google Cloud project for noncommercial use

The process in six steps

01

Organization type

State what kind of organization you are (e.g. Nonprofit).

02

Noncommercial eligibility

Answer the questionnaire on how you use Earth Engine.

03

Plan selection

Select the right quota tier (Community).

04

Describe your work

Indicate climate categories and areas of use.

05

Review & API

Check the summary, then enable the API.

06

Project management

Track or update the registration, or create a project.

SECTION 01 • STEP 1 OF 6

01

Organization type

What kind of organization do you represent?

Select your organization type

1 In **Earth Engine** › **Configuration**, click **Register**.

2 Pick the type from the list — here **Nonprofit**.

3 Click **Next** to move to step 2.

All 5 form steps stay visible, so you can track your progress.

Source: Google Cloud console, *Earth Engine* › *Configuration* › *Register* (screenshot).

SECTION 02 • STEP 2 OF 6

02

Noncommercial eligibility

Is your use of Earth Engine noncommercial?

Complete the eligibility questionnaire

1 Organization name: **INS_Africa**.

2 Paid by commercial or government entities? **No**.

3 Type of use: **Operational decision making**.

Research-only grants do not count as payment.

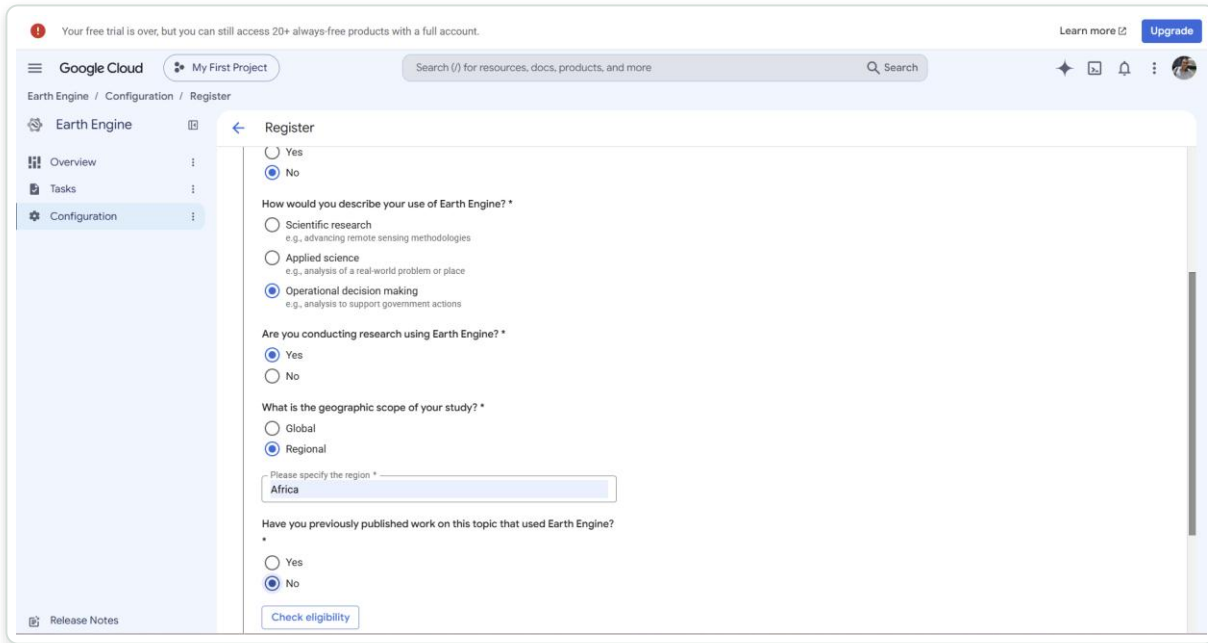

The screenshot shows the Google Cloud console interface. At the top, a banner states: "Your free trial is over, but you can still access 20+ always-free products with a full account." The navigation bar includes "Google Cloud", "My First Project", and a search bar. The left sidebar shows the "Earth Engine" menu with options for "Overview", "Tasks", and "Configuration". The main content area is titled "Register" and shows step 2: "Check noncommercial eligibility". The form includes the following questions and answers:

- What is the name of your nonprofit? *
INS_Africa
- Will you receive any payment (including fee-for-service) from commercial entities, operational entities, or government organizations for applications or data created using Earth Engine? Note: This does not include research-only grants. *
☐ Yes
☒ No
- How would you describe your use of Earth Engine? *
☐ Scientific research
e.g., advancing remote sensing methodologies
☐ Applied science
e.g., analysis of a real-world problem or place
☒ Operational decision making
e.g., analysis to support government actions
- Are you conducting research using Earth Engine? *
☒ Yes
☐ No
- What is the geographic scope of your study? *
☐ Global
☒ Regional

At the bottom left of the sidebar, there is a link for "Release Notes".

Source: Google Cloud console, "Check noncommercial eligibility" step (screenshot).

SECTION 03 · STEP 3 OF 6

03

Plan selection

How much computing power do you need?

Choose a quota tier

COMMUNITY

150 EECU-h / month

No billing account required. Tier selected here.

CONTRIBUTOR

1,000 EECU-h / month

Active billing account required, but no charge for noncommercial Earth Engine use.

Your free trial is over, but you can still access 20+ always-free products with a full account. [Learn more](#) [Upgrade](#)

Google Cloud My First Project Search (/) for resources, docs, products, and more

Earth Engine / Configuration / Register

Earth Engine Overview Tasks Configuration

Register

1 Choose your plan

Please select a quota tier:

☒ **Community**
Intended for undergraduate students and other low computation users. 150 EECU-hour limit. A billing account is not required for this tier.*

☐ **Contributor**
Intended for graduate students, nonprofits, and scientific researchers doing noncommercial work. 1,000 EECU-hour limit. An active billing account is required for this tier, but you will not be charged for Earth Engine noncommercial usage. If you exceed the quota limit for this tier, your project will enter [restricted mode](#). You will not accrue any charges for excess usage in restricted mode while your project remains noncommercially registered. [Learn more](#) [G*](#)

Do you need much higher compute resources for high-impact sustainability work that generates data products that influence environmental policy and practices? Nonprofits/NGOs, university research groups, or government research groups can [apply for the Partner Tier](#). A billing account is not required for this tier.*

* If you use this project with an active billing account for other Google Cloud services, you may be charged for that usage.

04

Describe your work

Which climate challenges does your work address?

Describe your work

The screenshot shows the 'Register' page in the Google Cloud console for Earth Engine. The page is titled 'Register' and has a left sidebar with 'Earth Engine' and 'Configuration' (selected). The main content area shows a progress bar with five steps: 1. Select your organization type, 2. Check noncommercial eligibility, 3. Choose your plan, 4. Describe your work (current step), and 5. Review summary. Under step 4, there is a section 'Does your work with Earth Engine fall into any of these categories?' with three options: 'Mitigation' (unchecked), 'Adaptation' (checked), and 'Protection & conservation' (checked). Below this is a dropdown menu for 'Will you use Earth Engine for any of the following? *' and a 'Next' button. At the bottom, there is a 'Review summary' section with 'Register' and 'Cancel' buttons.

Selected categories

– Mitigation

✓ Adaptation

✓ Protection & conservation

1 Tick the relevant categories.

2 Fill in **Will you use Earth Engine for...** (required).

Source: Google Cloud console, “Describe your work” step (screenshot).

Select areas of use

- 1 Open the drop-down list.
- 2 Tick at least one area — here **AI / ML**.
- 3 Confirm with **OK**, then **Next**.

Required field: with nothing selected, “This field is required” blocks you.

Your free trial is over, but you can still access 20+ always-free products with a full account. [Learn more](#) [Upgrade](#)

SECTION 06 • STEP 6 OF 6

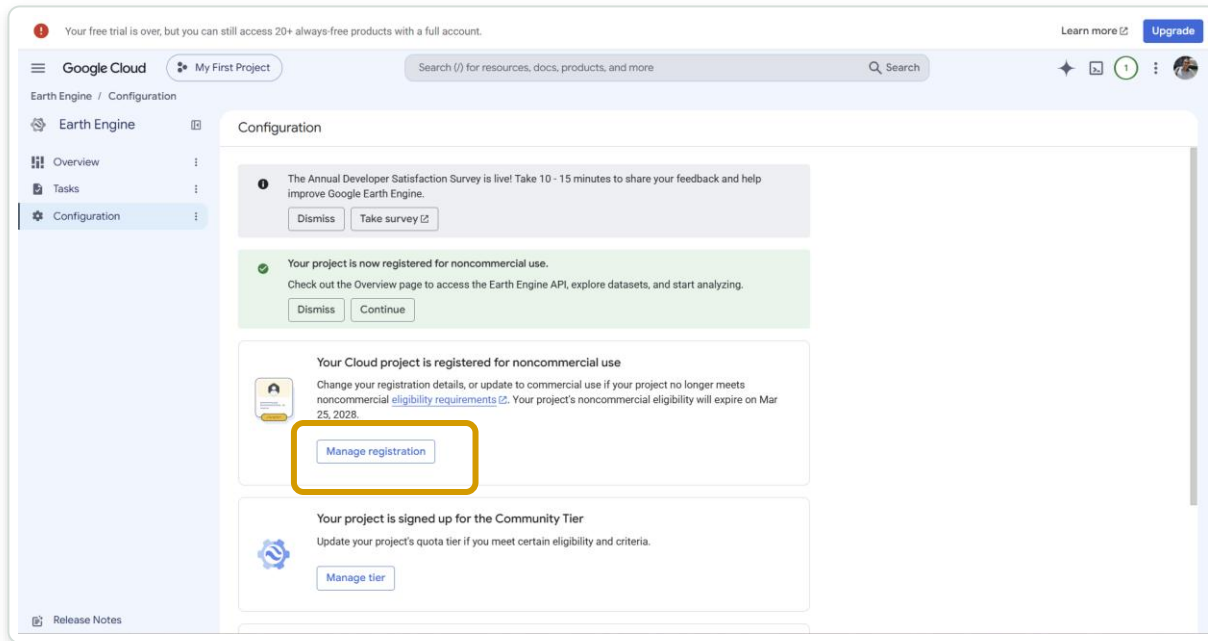

06

Project management

How do you manage your registration over time?

Registration confirmed

ELIGIBILITY VALID UNTIL

25 March 2028

Tier: Community

- 1 **Continue:** open the Overview page.
- 2 **Manage registration:** edit the registration.

Source: Google Cloud console, Configuration page (screenshot); expiry date specific to this project.

Manage the registration

Update answers

Edit your answers.

Switch to commercial

Move to commercial use.

Register a new project

Register another project.

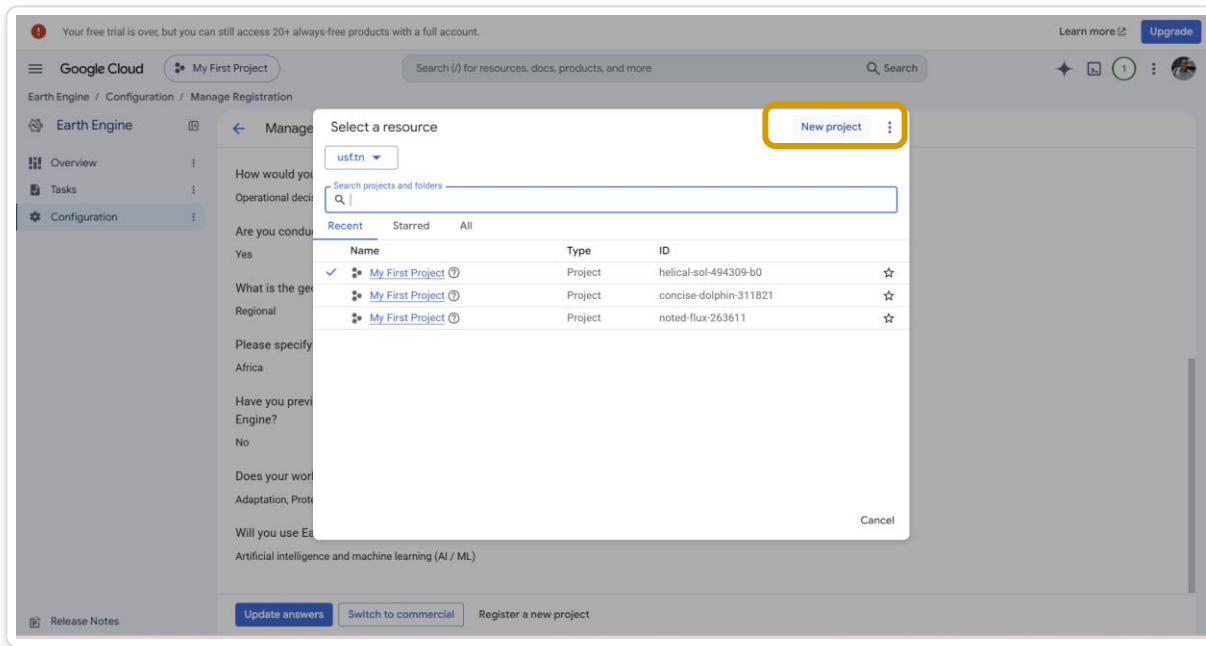

The screenshot shows the Google Cloud console interface for managing Earth Engine registration. The page title is "Manage Registration". The left sidebar shows the "Configuration" menu item selected. The main content area contains a registration form with the following questions and answers:

- How would you describe your use of Earth Engine?
Operational decision making
- Are you conducting research using Earth Engine?
Yes
- What is the geographic scope of your study?
Regional
- Please specify the region
Africa
- Have you previously published work on this topic that used Earth Engine?
No
- Does your work with Earth Engine fall into any of these categories?
Adaptation, Protection & conservation
- Will you use Earth Engine for any of the following?
Artificial intelligence and machine learning (AI / ML)

At the bottom of the page, there are three buttons: "Update answers", "Switch to commercial", and "Register a new project". The "Register a new project" button is highlighted with a yellow box.

Source: Google Cloud console, "Manage Registration" page (screenshot).

Select or create a project

- 1 The **Select a resource** dialog lists your projects.
- 2 Pick an existing project by its ID...
- 3 ... or click **New project**.

Several projects can share a name: rely on the ID.

Source: Google Cloud console, "Select a resource" dialog (screenshot).

Create a new project

- 1 Enter the **Project name**.
- 2 Set **Organization** and **Parent resource**.
- 3 Click **Create**.

The project ID and organization cannot be changed after creation.

The screenshot shows the 'New Project' page in the Google Cloud console. At the top, there's a search bar and the 'Google Cloud' logo. Below the header, the title 'New Project' is displayed. A yellow warning box states: 'You have 21 projects remaining in your quota. Request an increase or delete projects. [Learn more](#)'. Below this, there's a 'Manage Quotas' link. The 'Project name' field is filled with 'My Project 90385'. Below it, the 'Project ID' is shown as 'proven-now-509714-m3' with an 'Edit' link. The 'Organization' dropdown is selected with a redacted name. Below it, a note says 'Select an organization to attach it to a project. This selection can't be changed later.' The 'Parent resource' dropdown is also selected with a redacted name and a 'Browse' link. Below it, a note says 'Select the organization or folder where this resource will be created'. At the bottom, there are 'Create' and 'Cancel' buttons.

Source: Google Cloud console, “New Project” page (screenshot).
